

## DECENTRALISED HEAT RECOVERY UNIT WITH **REMOTE CONTROLLER**

### APPLICATION

Decentralised Mechanical Ventilation unit, with alternate flow and heat recovery core ("push-pull" type): extremely low energy consumption.

For installation in single room such as living room and bedroom: for a better flow balancing two units are commonly used in parallel operation, having opposite and synchronised flows.

### SPECIFICATIONS

**Internal ventilation unit and wall base** made of high quality ABS providing long lasting shockproof and robust construction. Finished in white RAL 9010 and UV resistant.

**Infra-red remote controller** with touch technology and wall base supplied as standard. Made from ABS, RAL 9010.

**Unique design winglet-type impeller**, providing enhanced aerodynamic properties, low noise and increased efficiency.

**High efficient reversible EC motor** with integral thermal protection, mounted on sealed for life high quality ball bearings. Designed for continuous running.

**Regenerative heat exchanger** with ceramic core with high thermal efficiency.

**Washable anti-dust filters**, on each side of the heat exchanger.

**Telescopic pipe** adaptable to the wall thickness.

**External grille** with anti-insect net and water drip guard.

### FEATURES & BENEFITS

**IPX4** protection degree.

**Aesthetic flat front cover** for modern interior design, easily removable for cleaning without the need of tools.

**Multifunction remote controller**, with LCD display to visualise the status of the unit.

**Back-up touch button** at the side of the ventilation unit.

**Automatic management** of the inversion time (comfort mode) to optimise the acoustic and thermal comfort.

**Integrated multi-colour led** to obtain a visual feedback of the unit status.

**Smart humidity control.**

**Free cooling:** extract only or intake only to prevent heat exchange when not needed.

**Simplified synchronisation** of more units (up to 10): thanks to a dedicated communication protocol the units get automatically synchronised when they are wired each other.

**Easy and safe maintenance** thanks to a magnet "coupling/uncoupling" system which allows the ventilation unit to be quickly removed from its base.

**Automatic anti-frost protection** to prevent frost building up on the heat exchanger.

**No water drainage** is needed.

**Streamlined electrical wiring** (L and N only).

**Totally recyclable plastic** components, environmentally friendly.

**Double insulated:** no earth connection is required.

**Tested to the latest standards:** units are tested in the TÜV Rheinland recognised laboratory at Aerauliqa, meaning accurate, up to date information on electrical safety, performance and noise level that can be relied upon. Designed and manufactured in accordance with EN60335-2-80 (Low Voltage Directive) and the EMC Directive (Electromagnetic Compatibility).

### OPERATION

Through the remote controller the following functionalities can be selected:

- airflow direction (alternate, extract only or intake only).
- free cooling.
- ON/OFF.
- speed (5 options).
- comfort/efficiency mode.
- boost speed.
- filter reset.

## Example of a complete ventilation system

**Application:** ideal solution in case of renovation.

**How it works:** the continuous running decentralised heat recovery units (Quantum NEXT) transfer thermal energy from air extracted from indoor rooms to incoming fresh air. Two units can work synchronised with balanced air flows and top acoustic comfort and can be controlled through the same IR controller.

The system can also include a single flow decentralised unit (Quantum MX) mounted in the wet room. No air distribution system is needed.

**Energy saving:** the preheated supplied fresh air and continuous air changes reduce the demand for additional heating. Quantum NEXT and Quantum MX are equipped with EC brushless motors which significantly reduce the electricity consumption.

**Indoor Air Quality:** a correctly specified mechanical ventilation system can ensure the quality of the indoor air is constantly maintained for the health and well-being of the occupants as well as of the building. Duly maintained filters on Quantum NEXT ensure that incoming air is suitably filtered before it enters the home.

## Dimensions (mm) and Weight (kg)

| Model            | □A  | B    | C       | ØD  | □E  | F     | G  | H  | I   | L  | M    | Weight |

- 220-240V ~ 50Hz - Air performance measured according to ISO 5801 a 230V 50Hz, air density 1,2 Kg/m<sup>3</sup>.

- data measured in the TÜV Rheinland recognised laboratory in Aerauliqa.

(1) sound pressure level @ 3m in free field, for comparative purposes only.

## Details

### Functionalities selectable via IR remote control:

- air flow direction (alternate, extract only, intake only).
- free-cooling mode.
- continuous speed (5 options).
- ON/OFF.
- boost speed.
- comfort/efficiency mode.
- filters reset.

Remote control and support base supplied
